Subject: Water Data Questions

Gregg,

I am going over my water-quality reports and have a couple of questions regarding 3rd and 4th quarter last year.

For 3rd quarter, is the turbidity at MC-2 supposed to be 162 NTU as entered, or is that a typo?

For 4th quarter, is the flow reading of 587 gpm reported at JC-1 in October correct? That seems really low, and you have 4097 gpm reported at ELD-1 for the same month.

Thank you for checking on these, I just want to make sure things are accurate.

Thanks,
Dana
